Description :

Prsentation de l'diteurThis book shows how grammar helps people communicate and looks at the ways grammar and meaning interrelate. The author starts from the notion that a speaker codes a meaning into grammatical forms which the listener is then able to recover: each word, he shows, has its own meaning and each bit of grammar its own function, their combinations creating and limiting the possibilities for different words. He uncovers a rationale for the varying grammatical properties of different words and in the process explains many facts about English - such as why we can say I wish to go, I wish that he would go, and I want to go but not I want that he would go.The first part of the book reviews the main points of English syntax and discusses English verbs in terms of their semantic types including those of Motion, Giving, Speaking, Liking, and Trying. In the second part Professor Dixon looks at eight grammatical topics, including complement clauses, transitivity and causatives, passives, and the promotion of a non-subject to

subject, as in Dictionaries sell well. This is the updated and revised edition of *A New Approach to English Grammar on Semantic Principles*. It includes new chapters on tense and aspect, nominalizations and possession, and adverbs and negation, and contains a new discussion of comparative forms of adjectives. It also explains recent changes in English grammar, including how they have replaced the tabooed *he* as a pronoun referring to either gender, as in *When a student reads this book, they will learn a lot about English grammar in a most enjoyable manner*. *Revue de presse* This new edition is a very welcome addition to the ever-growing number of texts dealing with the complexities of English grammar (Martin J. Endley, *Studies in Language*, vol. 32:4) *Présentation de l'auteur* This book shows how grammar helps people communicate and looks at the ways grammar and meaning interrelate. The author starts from the notion that a speaker codes a meaning into grammatical forms which the listener is then able to recover: each word, he shows, has its own meaning and each bit of grammar its own function, their combinations creating and limiting the possibilities for different words.
