Description :

Prsentation de l'diteurA school garden is a tremendously valuable tool to help young people turn book knowledge into real experience. This book is a must-have resource for anyone considering embarking on a youth gardening adventure. Mike Metallo, President, National Gardening Association In this groundbreaking resource, two school garden pioneers offer parents, teachers, and school administrators everything they need to know to build school gardens and to develop the programs that support them. Today both schools and parents have a unique opportunityand an increasing responsibilityto cultivate an awareness of our finite resources, to reinforce values of environmental stewardship, to help students understand concepts of nutrition and health, and to connect children to the natural world. What better way to do this than by engaging young people, their families, and teachers in the wondrous outdoor classroom that is their very own school garden? It's all here: developing the concept, planning, fund-raising, organizing, designing the

space, preparing the site, working with parents and schools, teaching in the garden, planting, harvesting, and even cooking, with kid-friendly recipes and year-round activities. Packed with strategies, to-do lists, sample letters, detailed lesson plans, and tricks of the trade from decades of experience developing school garden programs for grades K8, this hands-on approach will make school garden projects accessible, inexpensive, and sustainable.
