## Description :

Prsentation de l'diteurDrawing on cognitive psychology and other fields, Make It Stick offers techniques for becoming more productive learners, and cautions against study habits and practice routines that turn out to be counterproductive. The book speaks to students, teachers, trainers, athletes, and all those interested in lifelong learning and self-improvement.Revue de presseThis is a quite remarkable book. It describes important research findings with startling implications for how we can improve our own learning, teaching, and coaching. Even more, it shows us how more positive attitudes toward our own abilities and the willingness to tackle the hard stuff enables us to achieve our goals. The compelling stories bring the ideas out of the lab and into the real world. --Robert Bjork, University of California, Los Angeles"If you want to read a lively and engaging book on the science of learning, this is a must. [...] the narrative is seamless and

polished. [...] This is a rich and resonant book and a pleasurable read that will leave you pondering the process through which you, and your students, acquire new knowledge and skills." --Hazel Christie, Times Higher Education, 3 April 2014  
Presentation de l'auteur  
Drawing on cognitive psychology and other fields, *Make It Stick* offers techniques for becoming more productive learners, and cautions against study habits and practice routines that turn out to be counterproductive. The book speaks to students, teachers, trainers, athletes, and all those interested in lifelong learning and self-improvement.
