Description : Description du produitBerkeley's idealism started a revolution in philosophy. As one of the great empiricist thinkers he not only influenced British philosophers from Hume to Russell and the logical positivists in the twentieth-century, he also set the scene for the continental idealism of Hegel and even the philosophy of Marx. This edition of Berkeley's two key works has an introduction which examines and in part defends his arguments for idealism, as well as offering a detailed analytical contents list, extensive philosophical notes, and an index.

Prsentation de l'diteurBerkeley's idealism started a revolution in philosophy. As one of the great empiricist

thinkers he not only influenced British philosophers from Hume to Russell and the logical positivists in the twentieth century, he also set the scene for the continental idealism of Hegel and even the philosophy of Marx. There has never been such a radical critique of common sense and perception as that given in Berkeley's *Principles of Human Knowledge* (1710). His views were met with disfavour, and his response to his critics was the *Three Dialogues between Hylas and Philonous*. This edition of Berkeley's two key works has an introduction which examines and in part defends his arguments for idealism, as well as offering a detailed analytical contents list, extensive philosophical notes and an index.

ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship, providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

Revue de presse There is something beautiful about the design of this series: their portability, even their tendency to become dog-eared. And this is a welcome reprint, sensitively edited. (Nicholas Lezard, *The Guardian*) the editions deserve great credit for the enthusiasm of their approach ... The introductions by eminent scholars put the thoughts of the author and the history of the time into clear perspective. Oxford should be given credit for making the classics accessible for all rather than just crib notes for students. (Jonathan Copeland, *Lincolnshire Echo*)
